

the Piper Focus

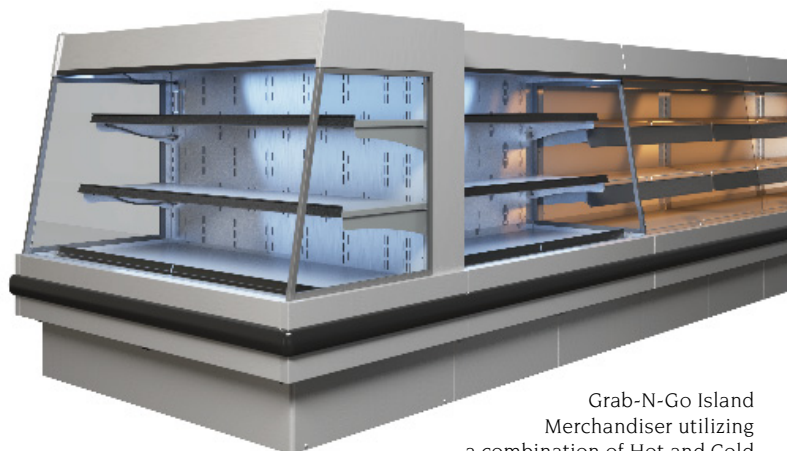

Modular Island Merchandisers

Customize your island with a variety of components

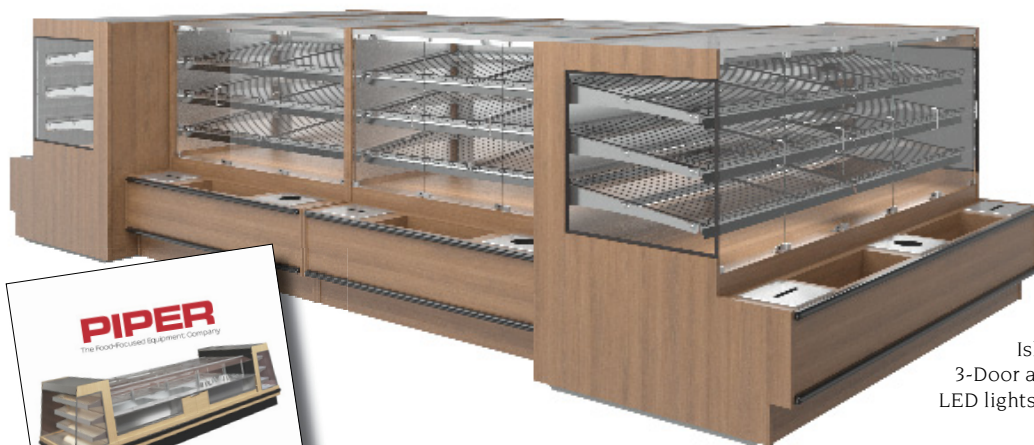

Piper's wide variety of merchandisers can be combined to create custom island configurations, for hot food or cold. We can design multiple combinations to fit any size operation, from a small convenience store to a large supermarket.

Our modular islands are designed using Grab-N-Go merchandisers, Artisan bread shelves, Bakery cases, Soup and Salad bars, and Pastry cases. A variety of features and options make this system not only extremely functional but attractive too, and enhance the display of your food product.

Any way you configure your Custom Modular Island, you will discover the practicality and the versatility to create the perfect merchandising solution for your operation.

Grab-N-Go Island Merchandiser utilizing a combination of Hot and Cold units with remote refrigeration.

Island Merchandiser built with 3-Door and 5-Door Pastry Cases with LED lights and custom laminate finish.
