Elite Hot Food Unit Heat in Base

4HF-HIB-FRMA-SRTS-SCB-CPGC

The heat-in-base system is a built-in option which permits handy storage of prepared foods directly under your Elite hot food wells. Pan rack assemblies are provided to allow storage of standard 12 x 20 food pans. Each pan rack assembly will accommodate the following full size pans: 6 - 2-1/2" deep pans or 3 - 4" deep pans or 2 - 6" deep pans.

Only Piper's equipment has the advantage of Food Safe technology and certification. This ensures that your food is kept "out of the Danger-Zone." Food spoilage occurs mainly because of rapidly accelerated bacteriological activity within the 40F-140F "Danger Zone."

With Food Safe hot food stays above 140F longer and cold food is kept below 40F. Both are key factors in HACCP compliance and the fight against foodborne pathogens.

ELECTRICAL

- Temperature in the heat-in-base controlled by a single thermostat. Heating elements are 500 watt tubular type. The heat-in-base is electrically interwired to the base unit thus one common cord and plug is provided. The availability of the heat-in-base option is dependent upon total amperage of the base unit plus the heat-in-base option. Drain value avits generator's left side as standard. Drain value is 2// • Drain valve exits operator's left side as standard. Drain valve is 3/4"
- FPT.
- For standard features and common options please refer to Elite Hot Food spec sheet.

It is our policy to build equipment which is design certified by companies that have been accredited at the Federal Level by the Occupational Safety and Health Agency (OSHA) and ANSI as a National Recognized Testing Laboratory. These companies include CSA International, Underwriters Laboratories, and the National Sanitation Foundation. However, a continuing program of product improvement makes it necessary to submit new models to the agencies as they are developed. Consequently, all models may not bear the appropriate labels at all times. We reserve the right to change specifications and product design without notice. Such revisions do not entille buyer to corresponding changes, improvements, additions or replacements for previously purchased equipment. Information is not for design purposes.
