FRAME AND BODY

The frame is constructed of all welded heavy gauge stainless steel. The body is stainless steel on all sides and top, and is fitted with a stainless steel tubular push handle. Model 2ATCA-ST is constructed similarly to Model ATCA-ST except that it consists of a double size frame and body and has two independent tray carriers and dispensing mechanisms to accommodate two stacks of trays. The front panel is removable for adjustment access.

DISPENSING MECHANISM

The tray and pan carriers (two on Model 2ATCA-ST), constructed of all welded 16 ga. stainless steel, are each raised by a series of coil springs attached to the frame. Ball bearing guides and a single stainless steel aircraft type cable keep each carrier level in all directions, even with an unbalanced load. The cable runs over pre-lubricated plated steel pulleys.

ADJUSTMENT

Adjustment for various tray or pan weights is easily accomplished by removing the front panel, then engaging or disengaging individual springs as required.

CASTERS

Each unit is mounted on four 4" diameter, heavy duty, swivel, casters.

Options**COMMON OPTIONS**

<input type="checkbox"/>	B	Corner Bumper (adds 2" to overall length and width)
<input type="checkbox"/>	PB	Full Perimeter Bumper (adds 2" to overall length and width)
<input type="checkbox"/>	WB	Two locking casters
<input type="checkbox"/>	Y4	Polyurethane 4
<input type="checkbox"/>	Y5	Polyurethane 5
