## Get Back to Basics with Piper

Design Basics Tables Help Keep Your Budget in the Black.

Piper's Design Basics Cafeteria Equipment is an economical solution to your serving needs. The simplistic design keeps material costs low, and the knock-down construction helps lower shipping costs. They are available as steam tables, ice pans, or solid tops, in 2-pan through 5-pan lengths. Standard features include all-stainless construction, 6" stainless steel adjustable legs, individual drain valves per well, and a poly-cutting board. Each steam well is powered by a 750 watt element, is infinite controlled, and can run wet or dry!

Options and accessories are plentiful for Design Basics and include manifold drains, tray slides, dish shelves, and a selection of single and double-sided protector guards. Casters can also be included in lieu of legs at no additional charge.

Design Basics is perfect for your back-of-house or tray make-up stations, as well as smaller meal service operations. And it won't break the bank while providing dependable service for years to come.
