Berkeley Hot Plates - Drop-in or Portable

.24" Thick Schott Ceran Pyroceramic Hot Plates are an attractive, sleek way to add heated merchandising to your counters

Piper's Berkeley Series Hot Plates offer an attractive and flexible approach to the display of hot foods. These electrically heated units are available in several styles, as drop-in or built-in models for use in serving counters to replace steam pans that hide the food; or as portable counter top models that can be easily relocated as required. Units are provided with either one, two or three individually controlled hot plate sections, each adjustable to a maximum of 250°F.

Additionally, models can be provided with an optional "hot spot" (excluding built-in models) or, with an optional sneeze guard with quartz heater for more even heating. We offer models ranging in lengths from 18" to 78" and in multiple depths from 19-5/8" to 33". They can be ordered in 120 Volt or 208 Volt configurations for maximum flexibility. You will be sure to find just the right unit for your operation. Visit www.piperproducts.com to find the perfect one among the entire line of Berkeley Hot Plates and more Food Focused equipment.

Optional Hot Spot reaches a maximum temperature of 932°F
