

the Piper Focus

Aluminum heated transport cabinets

Insulated and non-insulated models available in multiple sizes.

Based on the popular 900 series from Piper, the industry standard in transport cabinets, our heated cabinets are durable enough for your most demanding applications.

- .125" thick aluminum base
- 14 gauge aluminized steel caster channels
- Side panels are constructed of aluminum extruded channels
- Capped with a double-pan top
- Supported with corner gussets for added strength

Heat and humidity is provided by our 1130 heater box. Lightweight and removable for easy cleaning, it has individual controls for heat and humidity, a digital temperature readout, and a one gallon stainless steel water pan. A louvered vent stack on the back panel ensures even distribution of hot air throughout the cabinet.

Full size models hold up to (34) 18" x 26" sheet pans. Half-size models hold 15 pans. Both sizes are available as insulated or non-insulated. The heater box is rated 120 volts and 1500 watts, and can plug into any standard wall outlet. They are perfect for your transport, storage and catering needs.

Call your local Piper Representative today to order yours!

Model #	Description	Depth	Width	Height	Pan Capacity	Ship Weight (lbs)
