## Mobile Steam Tables

Ideal for Hotel and Healthcare Operations

DME Series Mobile Steam Tables from Piper are perfect for operations where meals are served at a distance from the kitchen. Standard features include a stainless steel cutting board and manifold drains. Two 5" diameter rigid casters and two swivel casters with brakes enhance mobility. A full-perimeter bumper is available to protect your surroundings as you roll through the halls, and a convenient push handle is standard for easy maneuvering.

Three, Four and Five-well models are offered. Each well uses an infinite-controlled 1000-watt element for quick heat-up times and consistent temperatures. A Heat-in-Base option is available for greater capacity, with built-in stainless steel racks to hold additional steam pans. All units are available in 208V and 240V variations, in single or three phase. DME-3-PTS, DME-3-PTSH and DME-4-PTS without heated base are available as 120V.

Visit [www.piperproducts.com](http://www.piperproducts.com) to see more options including tray slides and protector guards to complete your mobile meal service steam tables.
