

PIPER

The Food-Focused Equipment Company

PRICE GUIDE

PRICING EFFECTIVE JULY 1, 2022

PIPER PRODUCTS, INC. TERMS AND CONDITIONS

ACCEPTANCE: All orders are subject to acceptance by Piper Products, Inc. in accordance with their terms. All orders accepted will be invoiced at the then current selling price. When deemed necessary, Piper Products, Inc. reserves the right to make design changes or add any improvements on equipment. All orders must be accompanied by written purchase order, stating model number, electrical specifications and shipping instructions.

ORDER CANCELLATION: Once an order has been entered into the production schedule and a written cancellation is received, there will be a cancellation charge of up to 15%. Orders for custom equipment cannot be cancelled.

PRICES: All prices and specifications are subject to change without notice. All prices are subject to any federal, state or local taxes, which may be applicable. Any such tax shall be the responsibility of the buyer.

SHIPMENT: Piper Products, Inc. reserves the right to select the manner and route of shipment, unless the customer furnishes exact written shipping instructions in advance. All shipments shall be F.O.B. Wausau, Wisconsin 54401.

RETURNS: Our written authority must be obtained before returning any merchandise within 5 days of invoice and be marked with the RMA number obtained from the factory. All shipped transportation charges must be prepaid. All equipment must be received in original packaging. Modified and/or customized equipment cannot be returned. Returns are subject to a restocking charge of 20%.

DAMAGED MERCHANDISE: Notify CARRIER in the event of lost or damaged shipments whether apparent at time of delivery or concealed damage discovered after unpacking. File your complaint the same day as the date of receipt, with the CARRIER, not with the Factory. Our responsibility ceases when the shipment is delivered to and/or accepted by an authorized carrier.

PAYMENT TERMS: Terms of payment are net 30 days from invoice date. Five percent (5%) cash with order discount (on equipment only) available when payment is received with order (this is a requirement for first time equipment sales until an open account has been established).

PIPER PRODUCTS, INC. LIMITED WARRANTY

Piper Products, Inc. warrants to the original purchaser that its equipment will be free from defects in the materials and/or parts for a period of 12 months from date of shipment.

The purchaser is responsible for having equipment properly installed, operated under normal conditions with proper supervision and to perform periodic preventative maintenance. Equipment failure caused by inadequate water quality, improper cleaning, harsh chemicals, or acids are not covered under warranty.

The manufacturer's obligation under this warranty shall be the replacement or repair of defective parts within the warranty period. Excessive labor (more than 1/2 hour) required to access Piper equipment built into cabinets, tables or structures by others, is NOT covered under labor warranty. Example: Piper multiple or single-well food wells. All labor shall be performed during regular working hours. Overtime premium will be charged to buyer. After thorough examination, the decision of the Piper Products Service Department shall be final. Recalibration is not under warranty.

Any defective parts to be repaired or replaced must be returned to Piper Products, Inc. 300 South 84th Avenue, Wausau, WI 54401, transportation charges prepaid, and they must be properly packed and tagged. The serial and model number of the equipment and date of original installation of such equipment must be given. However, after one year we will not assume any responsibility for any expenses (including labor) incurred in the field incidental to the repair or replacement of equipment covered by this warranty. Our obligation hereunder to repair or replace a defective part is the exclusive remedy for breach of this warranty; and we will not be liable for any other damages or claims, including consequential damages.

If, upon inspection by Piper Products, Inc. or its Authorized Service Agency, it is determined that this equipment has not been properly installed, has not been used in an appropriate manner, has been modified or has not been properly maintained, the warranty will be void. Also, if the nameplate or other identifying marks have been removed, defaced or changed or the unit has been repaired or altered by persons other than expressly approved by Piper Products Inc., the warranty will be void. If the equipment has been subjected to misuse or misapplication, neglect, abuse, accident, damage during transit or delivery, fire, flood, riot or acts of God, then this warranty shall also be void. When any situation occurs which voids the warranty the manufacturer shall not be liable for any damage to any person or any property which may result from the use of the equipment thereafter.

Warranty is limited to Piper manufactured products only and does not apply to other equipment which may be connected to or installed within.

No representative, dealer, distributor or any other person is authorized or permitted to make any other warranty or obligate Piper Products, Inc. to any liability not strictly in accordance with this policy.

This warranty is in lieu of all other warranties expressed or implied, including any warranty of merchantability and fitness for a particular purpose. Piper Products does hereby exclude and shall not be liable to purchaser for any consequential or incidental damages including but not limited to damages to property, damages for loss of use, loss of time, loss of profits or income, resulting from any breach of warranty.

CAFETERIA / BUFFET

Piper Serving Lines

Elite

The Elite line of Café/Buffer equipment has many distinct features, including:

Stainless Steel

Elite's most powerful attribute is its stainless steel construction. 14 gauge corner posts sit on a rugged foundation of 14g aluminized steel caster channels with an 18g stainless steel bottom shelf. The top is constructed of 14g stainless as well with body panels of 20g stainless.

Design Flexibility

The modular design of Elite allows for complete flexibility. Units can be made to any length up to 117", any height, or any depth, ensuring a perfect fit for your cafeteria.

Elite Slimline

19" compact units

- Perfect for tray make up lines
- Features a narrow profile to fit in tight spaces
- Laminate and Powder Coat Finishes Available

Reflections

Reflections Café/Buffer equipment offers the same features and benefits of Elite, housed in a durable fiberglass shell.

Fiberglass

Reflections incorporates a fiberglass body for a more sleek, modern look. Pound for pound, fiberglass is stronger than concrete, steel or aluminum. It is dent proof, scuff resistant and easy to clean. With limitless color choices, the molded-in surface coat that contains the color is resistant to ultraviolet attack and airborne contamination.

Modular Units

Units are available in 2-6 well configurations (28"-96"), are 30" deep, and can be ordered in petite height of 30" tall up to the 36" standard height.

Protector Guards

Available in a variety of configurations.

Cafeteria guards allow you to service customers with ease.

Buffet guards allow for self service.

Tray Slides & Cutting Boards

Choose between 3-bar, solid, ribbed trayslides and cutting boards.

Hinged and removable for easy transport and cleaning.

Tray Slides comply with American Disabilities Act and can be mounted at any height.

Stainless Tops

Piper's Elite 500 gives you construction features you won't find anywhere else. Our standard stainless steel top is 14 gauge, while most others offer 16 gauge.

Works-In-A-Drawer

Our Reflections units offer Works-In-A-Drawer functionality for swapping out heat elements and basic electrical components.

Solid Surfaces

Solid Surface counter tops are available in several contemporary finishes giving you the performance of stone and the elegance of marble, with the everyday practicality, durability, and easy care stain resistance.

**Optional*

Locking Understorage

Store your products securely with locking cabinet doors.

**Optional*

Interlocking Connector

Bullet interlocks lock units together providing a seamless look while securing your lineup. All units are designed for modular installation - Mix and match cold or hot units to fit precisely the serving line you need.

Food Wells

Hot food stays hot with Elite's standard 1000 watt elements. Wells run wet or dry. Food is easily removed for cleaning with built-in drains.

Full Skirt

Hide those casters! With Elite's option to add skirting so that a smooth, even, to-the-floor look greets your customers, without unsightly casters or under the unit paraphernalia.

**Optional*

Heat Lamps

Units can be fitted with heat lamps to help maintain food temperatures.

**Optional*

Adjustable Height

Piper's Elite and Reflection units can be made with either manual crank or mechanical lift system to change height on the fly.

**Optional*

Domed Heat Lights

Units can be fitted with domed lights.

**Optional*

How to order your custom line up:

Designing your custom line-up is easy. Simply follow these 4 steps and you are on your way to building a top of the line buffet.

4 Select Your Finish

Powder coating, custom laminates and decals to finish off your buffet line up.

Stainless Steel

Snapshot

Standard

The extreme durability and easy cleaning of stainless steel makes it the first choice for strict hygiene conditions, such as, hospitals, kitchens, and other food processing environments, while providing a modern and attractive appearance.

Laminate

Snapshot

Laminate offers a wide range of patterns and colors. Surfaces can mimic everything from wood grains and stone to subtle textures and solids. Laminate is made of plastic-coated synthetics with a smooth surface that's easy to clean.

FRMAD	Formica Laminate With Doors		\$1,046.00		\$1,148.00		\$1,387.00		\$1,530.00		\$1,705.00

Powder Coat

Snapshot

Color selection is virtually unlimited with flat, satin, gloss, high gloss, metallic, candies, clear, iridescent, fluorescent, wrinkle, hammer tone, and glitter finishes available. Powder coated surfaces are resistant to chipping, scratching, fading, and wearing.

Powder coating Add the powder coating to your design specifications! Choose from unique and beautiful colors by indicating your PMS reference number upon ordering.

WORKS IN A DRAWER

Reflections' Exclusive Element Replacement System

Reflections 4 Well Hot Food Unit
Shown with options

***Eliminates Down Time On
Your Steam Table and
Saves You Money In
Three Easy Steps.***

**Quickly replace and repair heating
elements on your hot food tables or
buffet units in half the time of our
competitors.**

The Piper Difference

1 Screw Removal

- Simply remove the screws holding the faceplate of the temperature controls.

2 Face Plate Removal

- Fold down the protective faceplate to reveal well drawers.

3 Element Access

- Slide the well drawer open to gain access to each of the heating elements.

2 Select Reflections Units

Piper's Reflections line of cafeteria and buffet equipment offer flexible solutions with fiberglass bodies and stainless steel tops.

Custom colored fiberglass tubs

Fiberglass

Snapshot

Pound for pound, fiberglass is stronger than concrete, steel or aluminum. It's dent proof, scuff resistant and easy to clean. With limitless color choices, the molded-in surface coat that contains the color is resistant to ultraviolet attack and airborne contamination.

Note:

Custom tub coat colors available.
Specify RAL gel coat color when ordering.

***We build products that fit
your plan with details that:***

- *Ease installation*
- *Ensure sizing & electrical compatibility*
- *Deliver reliable, trouble-free performance*
- *Simplify upkeep and maintenance*

The Piper Difference

Controls

- Choose between infinite or thermostatic temperature control
- Pilot lamps standard

Piper Locks

- Solid, secure clamps speed installation
- Easy removal for servicing if needed

Heated Plate Dispensers

- Equipped with 120-volt, 60-cycle single-phase tubular heater and thermostat mounted in base of dispenser
- Lighted on/off switch
- Heated models equipped with 4-foot cord set and NEMA 5-15 or 5-30 plug

***Piper Offers a comprehensive line including both drop-ins and built-ins.
Our equipment installs smoothly, integrates seamlessly, and delivers
years of reliable trouble-free performance.***

Top-mounted fully-insulated units come standard with 208/240v-1200/1600W, power and thermostats. Infinite controls available upon request. Piper locks are standard on all top mounted units, as are thermostats on all single Piper wells.

QUICK CHECK ORDERING INFORMATION

MODEL	DESCRIPTION
☐ CC	Cove corner built-in
☐ CCF	Cove corner drop-in
☐ OD	Without drain
☐ D	With Drain
☐ A	Fully-insulated well
☐ B	Bottom-insulated only well
☐ T	Thermostat
☐ I	Infinite

MODEL	DESCRIPTION
☐ L	Listed
☐ R	Recognized
☐ 12	Voltage 120
☐ 20	Voltage 208
☐ 24	Voltage 240
☐ 10	Wattage 1000
☐ 12	Wattage 1200
☐ 16	Wattage 1600

PLEASE USE THE QUICK CHECK ORDER CHART TO CREATE THE MODEL NUMBER.

NOTE: When ordering thermostatic or infinite controls, voltages of 208V or 240V have 1200W / 1600 wattage, respectively, and can be wired for either 208V or 240V power.

Length of control wires or conduit (std. 48") 72" Option with infinite controls only.

To order units, simply check options listed above which will generate a specific order model for your customer.

Select one in each area:

CC = Cove Corner (Bottom-mount)
CCF = Cove Corner (Top-mount) Flanged

NOTE: When ordering hot food wells in 208V or 240V elements, the wattages will be 1200 / 1600W, respectively. Example: 208 / 240V - 1200 / 1600W.
• When ordering above hot food wells, please complete the model numbers (at the end) by selecting the voltage & wattage required.

COOL BREEZE DROP-IN (FORCED AIR COLD PAN) Listed NSF/ANSI Standard 7

NSF 7 Cool Breeze Drop-In

An innovative air curtain keeps product at 41°F or cooler without ice or water. The cascade of cool air maintains correct temperature without drying or freezer burn.

Product Features

Adjustable adapter bars can be custom configured for many pan sizes and salad bar layouts

The Piper Difference

Enclosed Base

Features an enclosed cabinet base fabricated of stainless steel. The lower edges of the base are double folded and reinforced with heavy-gauge stainless steel gusset plates at each corner. An optional non-marking bumper can be attached at each corner.

Reinforced Frame

The base is fabricated of 16-gauge stainless steel and reinforced with stainless steel angles. Frames are securely welded to stainless steel angles on the underside of the base. 16-gauge tubular frames are reinforced by horizontal stainless steel rods welded to each vertical frame.

Heated Units

Heated units are equipped with a 120-volt, 60-cycle single-phase tubular heater and thermostat mounted in the base of the dispenser. A lighted on/off switch is mounted in one of the plastic guides on top of the dispenser. All heated models are equipped with a 4-foot cord set and NEMA 5-15 or 6-15 plug.

Heavy Duty Channels

The base of these models is fabricated of stainless steel and reinforced with heavy-gauge stainless steel hat channels. The pylon is fabricated of stainless steel welded to the base.

-  A Piper Products' Exclusive, the TUMBLER SERVE™ holds more drinkware (up to 425 tumblers!) than competing units of the same size.
-  Eliminates the need for 20" x 20" glass racks.
-  Stores multiple size tumblers (8-oz. to 14-oz.) in one unit at one time.
-  An innovative rack-free, lift-and-serve design for effortless loading, rapid dispensing and easier maintaining.
-  Replenishes drinkware with ease throughout the lengthiest of service cycles.

HEALTHCARE

Choose The Piper Difference:
*Ensuring that your food is kept
out of the **DANGER-ZONE**.*

Only Piper's equipment has the advantage of FoodSafe technology and certification. Since food spoilage occurs mainly because of rapidly accelerating bacteriological activity within the 40°F to 140°F **DANGER-ZONE**, FoodSafe ensures hot food stays above 140°F longer and cold food is kept below 40°F. Both are key factors in HACCP compliance and the fight against foodborne pathogens.

Choose Piper's FoodSafe Difference For Enhanced Food Quality & Improved Food Safety.

Note: Furnished standard with lever handle drain. Bowl size 24" x 24" x 8" deep.
*Add 10" for height from back of chute to front of sink.

RACKS

Ideal for kitchen, bakery, freezer and meat applications.

The Piper Difference

Superior Piper-Engineered Base

The strongest foundation in the industry

- Two 14-gauge aluminized steel reinforcing caster channels eliminate twisting
- .125"-thick aluminum bottom panel (.080" on Angle Rack)
- Rolled edge acts as a built-in bumper
- Fully welded corners

Heavy-duty Casters

For added rigidity and stability

- 5" x 1-1/4" sealed wheels
- 350 lbs. capacity
- Maximum resistance to chemicals, acids, bases, alcohol, water and steam
- Maximum low temperature flexibility for superior performance, even in freezing temperatures
- Optional 5" x 2" size available

Durable Corner Supports

All sides fully welded

- Extruded three-sided channel support
- .190"-thick gussets

Continuous Weld

An extra measure for extra strength

- Fully welded along entire edge of glides
- No gaps to promote bacterial growth

Tie Bars

For added rigidity and stability

- Two 1/2" aluminum rods keep racks square

Sturdy Tray Supports

Reliable performance under strain

- 1" x 2" .080"-thick aluminum extruded glides
- Welded on front and back to the frame

KNOCK DOWN ANGLE RACKS

Knock Down Angle Racks

Strength and versatility at an economical price

- Twice the welds of competitive racks
- A third more aluminum tubing than the competition
- Double welded side glides for added strength
- Glides are 1" x 1-1/2" .080"-thick aluminum welded front and back to the frame
- Assembles in minutes (fully welded available)
- Choose from roll-in, front or side-load models
- **Can be shipped via Common Carrier!**

NESTING RACK

Nesting Rack
The ultimate space-saving storage technique for empty racks

- When empty, nesting racks fit together, minimizing storage space needed – 3 racks now take up the space of one
- Nesting frame interlocks to allow one person the ability to move multiple empty racks
- Reinforced with fully welded c-channel for strength, rigidity and stability
- 1" x 2" .080"-thick aluminum glides welded front and back to the frame

The Piper Difference

Superior Piper-Engineered Base

The strongest foundation in the industry

- Two 14-gauge aluminized steel reinforcing caster channels eliminate twisting
- .125"-thick aluminum bottom panel
- Edges are formed and rolled to create built-in bumper
- Fully welded corners

Performance Heavy-duty Casters

- 5" x 1-1/4" sealed wheels (Optional 5" x 2" size available)
- Delrin bearing, each with 350 lbs. capacity
- Maximum resistance to chemicals, acids, bases, alcohol, water and steam
- Maximum low temperature flexibility for superior performance, even in freezing temperatures

Card Clip

- Easy identification of contents when door is closed

Side Door Latch

- Flush mounted to hold the door open and out of the way

Double Pan Top

Strongest top in the industry

- Two .080"-thick aluminum panels cupped together
- Fully welded corners

Continuous Weld

An extra measure for extra strength

- Fully welded along entire edge of glides
- No gaps to promote bacterial growth

Heavy-duty Hinges

Durable design

- Constructed of 14-gauge stainless steel
- Zinc plated for lasting durability and good looks

Durable Corner Supports

All sides fully welded

- Extruded three-sided channel support
- .190"-thick gussets

CHEF SYSTEM

All The Standards & All The Extras.

Chef System ovens come fully equipped with a 250°F. (121°C) thermostat, product probe, power interruption alert, locking door handle, 4" (10 cm) locking casters, chrome wire racks, sheet pan and a 6 ft. (183 cm) attached cord with plug as standard. The following options and accessories are also available:

- 350°F. (177°C) Thermostat (for Non-Smoker Models)
- Perimeter Bumpers
- Stainless Rib Rack
- Casters: Large 5" (13 cm) and Low Profile
- Stainless Steel Legs

CS2-10S

PIPER 
Made In The U.S.A

CS2-5

The Piper Difference

Optional Perimeter Bumpers protect the Chef System ovens from the heavy-duty use of foodservice operations.

Drip Tray magnetically attaches to front base of all models to collect excess moisture.

Optional Stainless Rib Rack keeps ribs upright for perfect cooking every time. Holds 13 slabs of baby back ribs.

Locking Door Handle is now standard on all Chef System ovens.

Optional Heavy-Duty 5" (13 cm) Casters enhance the portability of the oven. (Adds 1" (2.5 cm) to standard height.) Not Shown – Low profile casters are also available (deduct 2" (5 cm) from standard height).

Amazing Standard Features

The compact height of the 5-pan models is only 34" (86 cm) which allows it to fit under most work tables, without sacrificing oven capacity. The power interruption alert and product probe are standard features on all Chef System models. Best of all, the new Chef System is quality engineered by Piper for years of dependable service. That's why foodservice professionals count on Piper to keep their customers happy and returning for more.

Exclusive Roast-Air™ Cooking Process combines 90% of radiant heat with 10% low velocity convection heat to brown food *naturally* without artificial coloring. Holding their natural juices and tenderizing them to mouthwatering perfection, Chef System is ideal for bringing out the peak flavor of both prime and economical cuts of meats.

Chef System Oven

Conventional Oven

Far less shrinkage. Meats cooked in the Chef System shrink only 7-10% compared to 25% in conventional ovens. The savings mean greater profitability when multiplying this difference by the hundreds of pounds of product you cook in a year. Since most of the natural moisture is retained, overproduction can be refrigerated and reheated the next day.

Simplified Digilog Controller™ Providing the Benefits and Accuracy of Digital Operation with a Friendly Feel. Chef System now offers the operator the flexibility to cook by time and temperature or cook with a probe. Fast, simple, easy!

SUPER SYSTEMS

Oven Proofer Combos • Ovens • Proofers

PIPER 
Made In The U.S.A

The Piper Difference

Cool Touch Technology

- Super Systems has developed a revolutionary door system that reduces heat transfer up to 50%.
- Our "Cool Touch" door is composed of a double-hinged door that keeps heat from transferring to the outer door, resulting in a temperature reduction of 90 - 135 degrees versus conventional doors.
- The glass is double-paned and each pane is Low-E coated for added insulation.
- Air flow channels between the doors allow outside air to travel between the glass, thus cooling the outer layer. All of these features together create the coolest touch door in the industry.

HVS: High Volume Steam

- High Volume Steam is available as an option on oven and oven/proofer models as noted in the pricing section (must be noted on the order). Steam allows the bread to gain spring and volume at the same time as contributing to the caramelization of the crust, giving the bread a good sheen and color.
- Plumbing: Water hooks up to 1/8" FPT
- Factory Installed
(call factory for details and electrical information)

WHAT MAKES A SUPER SYSTEM?

Natural Convection Technology

Superior Baking

- Genuine "Hearth Bake" means that once the aluminum decks in the oven are heated to the proper temperature, the product is baked by radiant heat and conduction which results in an uncommonly even bake.
- Super Systems Ovens do not have fans blowing inside the oven to dry out your product which results in a moister bake.
- Heavy Gauge Aluminum decks generate radiant heat for even heat distribution.
- Natural Convection –Does not dry out product.
- Ovens/Proofers great for breads, pizza, rolls and muffins.
- Individual Heat and Humidity Controls.
- Bake on deck or pans.
- Single or double oven configuration ranging from 2 to 18 pans.

Energy Consumption

- The patented "Heat Sink" principle retains the temperature once the oven has pre-heated to the desired setting.
- Once the oven has reached the desired setting, the energy to each thermostat/element is OFF thus using significantly less energy than traditional convection ovens. At this point the only thing drawing energy is the lights.
- Conventional ovens constantly have to produce more hot air and thus draw more energy – greatly increasing the cost to operate.
- It costs less than \$4.00 per day to operate for 12 hours based on a \$0.11 per KWH charge. Rates depend on your location.

OP-3 Power Usage Example

The U.S. average rate per hour for the last 5 years has varied from \$.11 to \$.14. Based on the U.S. average rates, the operating cost for an OP3 ranges from \$3.96 to \$5.04 a day based on a 12 hour day. Local rates will vary.

KWH		TIME		RATE		COST
3.0 kwh	X	12 hours	X	0.11	=	\$3.96 per day
3.0 kwh	X	12 hours	X	0.12	=	\$4.32 per day
3.0 kwh	X	12 hours	X	0.13	=	\$4.68 per day
3.0 kwh	X	12 hours	X	0.14	=	\$5.04 per day

The OP3 has a total wattage of 8.25kw. The average consumption per hour of operation is approximately 3.0kwh.

Efficient Operation

- Lowest Maintenance Ovens and Proofers in Industry.
- Uses less of your valuable floor space.
- Uses considerably less energy.
- No moving parts to break down eliminates maintenance and keeps the service agent away.
- Thermostats and timers can be easily self-serviced and changed in minutes by the operator.
- Heat reflective glass door provides energy efficiency and sight baking along with merchandising.

Flexible System

- Systems for various store sales volume.
- Product versatility/wide range of products.
- Total control over baking environment through individual deck controls allowing for more operator control.
- Heavy gauge aluminum decks give even heat distribution, conduction heat, and lower energy consumption.

CAPACITY

OVEN ACCOMMODATES:

- » 3 - 18" x 26" sheet pans
- » 6 - 4-strapped 1 lb. bread pans
- » 6 - 4-strapped 1.5 lb. bread pans
- » 18 - 9" pies
- » 3 - 18" pies
- » any combination of the above
- » maximum oven temp. 450°

PROOFER ACCOMMODATES:

- » 9 - nylon-coated wire racks (6 furnished)
- » 9 - standard 18" x 26" sheet pans
- » 8 - 4-strapped 1 lb. bread pans
- » 8 - 4-strapped 1.5 lb. bread pans
- » any combination of the above

SHIPPING INFORMATION

- » Shipping weight: 600 lbs.
- » Cubic feet: 50.44
- » Freight class: 100

STANDARD FEATURES

- » Less than 8 sq ft of floor space
- » Individually controlled oven and proofer
- » Each oven deck individually thermostatically controlled, provides precision "hearth" bake, and allows for more control over baking environment
- » Natural convection & radiant heat design does not dry out product
- » No moving parts in oven reduces maintenance problems and increases reliability
- » Full-view, heat-reflective tempered glass door allows for energy-efficient sight baking and proofing
- » Each brightly lit deck provides sight merchandising
- » Heavy-duty, stainless steel construction easily cleaned and maintained
- » Individual heat and humidity controls in proofer provide precise control over proofing/warming environment
- » High volume blower in proofer circulates heat and humidity efficiently in proofer
- » Manual fill water pan has 4.3 quart capacity, auto-humidity optional
- » Positive magnetic door closure
- » 60 Minute reminder timer
- » Field reversible doors, left or right hinged
- » Removable drip trough provided under proofer door

Automatic Humidity is standard on all proofer models with the exception of Model AP and OP-3.

Factory Installed (call factory for details and electrical information)

COOL TOUCH TECHNOLOGY

**Only
Super Systems
offers
"Cool Touch
Technology"**

MODEL #	DESCRIPTION	LIST PRICE
-CTT	Cool Touch Technology	\$807.00

Super Systems has developed a revolutionary door system that reduces heat transfer up to 50%. Our "Cool Touch" door is composed of a double-hinged door that keeps heat from transferring to the outer door, resulting in a temperature reduction of 90 - 135 degrees versus conventional doors. The glass is double-paned and each pane is Low-E coated for added insulation. Finally, air flow channels between the doors allow outside air to travel between the glass, thus cooling the outer layer. All of these features together create the coolest touch door in the industry.

All orders must be accompanied by written purchase order, stating model number, electrical specifications (voltage and phase) and shipping instructions. Installation of equipment to incorrect voltage and phase will void warranty.

OVEN ACCESSORIES AND BAKING PANS

MODEL #	DESCRIPTION	LIST PRICE
905001	Baking Release, 14 oz. each	\$17.00
902001	18 gauge 18" x 26" Aluminum Sheet Pan	\$52.00

MERCHANDISERS

Piper Series OTR (Omnitop Cold) Self Service

**24 hour display capability
eliminates daily labor of
unloading and loading of product**

The Piper Difference

Features

- Cold - 38 to 40°F display ranging from 4 to 24 hours
- Stainless Steel and Tempered Glass Construction – Emphasizing food display
- Hinged Glass Top & Evaporator for ease of cleaning
- Adjustable Shelves
- Modern Design
- Laminate Colors on Inouk
- Rear Doors and Roll Down Night Cover Options Available

The Food is cooled by a precisely controlled air flow pattern that maintains 38°F to 40°F within the cabinet, even though the customer side is open for self service.

Storage Capacity

Wells that allow for storing drinks, salad bowls or 4" deep steam pan containers.
Shelves are 14" deep.

Flexible Installation

Shelves on toothed racks, adjustable in height: adaptation of the volume of exposure, possibility of presenting a large variety of products.

Hygiene and Cleaning

Evaporator installed on jacks with gas: easier to use and to clean
Removable upper glass shelf

The Piper Difference

Ultra Violet Ozone Sterilization (Optional)

Software for monitoring systems (Optional)

Full Range Offering from countertop to 3 rack roll in

HACCP Time and Temperature Printer (Optional)

Glycol Coolant (Optional)

Monoblock construction with 3.5" sealed insulation

Remote compressor options for select models

Heated Core Probe

All models have a key for heating the core probe needle. This is needed when you have to extract the core from a frozen product. The timed heating device gives instant and perfect extraction each time after freezing.

Optional Heated Core Temperature Probe with 4 reading points also available.

Ergonomic

Handle-free doors, with door-pull along the whole height of the actual door. This facilitates reversing door opening (right and left) whilst guaranteeing the facility of the grip and more thorough cleaning.

You will taste the Piper Difference

The Benefits Of A Piper Blast Chiller

Enhanced Food Quality

- Rapid chilling/freezing preserves the original aroma, taste, texture, and appearance
- Stopping the cooking process realizes greater nutritional retention
- Lengthy hot holding periods can be eliminated

Profitability

- Food preparation can be done in advance or outside of rush hours
- Food preparation not linked to service time
- Bulk purchases can be made when pricing is favorable
- Lower weight loss/shrinkage by not losing out to normal moisture loss through evaporation
- Whole meats retain 5% to 10% more weight
- Waste is reduced since food can be prepared, chilled/frozen, and served when required
- Don't have to throw out profitable product due to no shows or cancellations
- Increase profitability by adding new menu items that can be prepared during slow times

Performance

- Indirect air flow promotes rapid chilling
- Soft & Hard chilling for light & dense products
- Shock freezing with air as low as -40°

Improved Food Safety

- Prevents Bacteria proliferation by rapidly moving food thru the danger zone (140 degrees to 40 degrees)
- Full Compliance with the FoodSafe practices of HACCP
- Increased sanitation is achieved by rapid cooling, cold storage, and Rethermalization just prior to service
- P.C. Compatible NAFEM date protocol compliant option

"S" Control

"T" Control

SETTING AND MEMORIZATION OF:

"S" Control

- Positive soft blast chilling cycle at 37°F "probe type" (Automatic: with core probe inserted in product)
- Positive hard blast chilling cycle at 37°F "probe type" (Automatic: with core probe inserted in product)
- Negative soft blast chilling at 0°F "probe type" (Automatic: with core probe inserted in product)
- Negative hard blast chilling at 0°F "probe type" (Automatic: with core probe inserted in product)
- Positive soft blast chilling cycle at 37°F "timed" (Manual: with or without core probe inserted in product)
- Positive hard blast chilling cycle at 37°F "timed" (Manual: with or without core probe inserted in product)
- Negative soft blast chilling at 0°F "timed" (Manual: with or without core probe inserted in product)
- Negative hard blast chilling at 0°F "timed" (Manual: with or without core probe inserted in product)

"T" Control

- Positive soft blast chilling cycle at 37°F "probe type" (Automatic: with core probe inserted in product)
- Positive hard blast chilling cycle at 37°F "probe type" (Automatic: with core probe inserted in product)
- Negative soft blast chilling cycle at 0°F "probe type" (Automatic: with core probe inserted in product)
- Negative hard blast chilling cycle at 0°F "probe type" (Automatic: with core probe inserted in product)
- Positive soft blast chilling cycle at 37°F "timed" (Manual: with or without core probe inserted in product)
- Positive hard blast chilling cycle at 37°F "timed" (Manual: with or without core probe inserted in product)
- Negative soft blast chilling cycle at 0°F "timed" (Manual: with or without core probe inserted in product)
- Negative hard blast chilling cycle at 0°F "timed" (Manual: with or without core probe inserted in product)

FUNCTIONS:

"S" Control

- Core probe heating to facilitate removal of frozen product
- Cycle memorization
- Manual activation of defrost cycle
- Automatic conversion to storage cycle at end of chilling/freezing cycle
- Sterilization

"T" Control

- Core probe heating to facilitate removal of frozen product
- Cycle memorization
- Manual activation of defrost cycle
- Automatic conversion to storage cycle at end of chilling/freezing cycle
- Sterilization
- Possibility of installing up to 4 core probes or a core probe with 4 sensors
- Alarm memorization (HACCP)

STANDARD DISPLAY:

"S" Control

- Probe temperature, if inserted
- Chamber temperature
- Active chilling phase
- Type of operation (timed, automatic, manual)
- Cycle type (chilling or freezing, soft or hard)
- Chiller state (chilling, storage, defrosting, stop)

"T" Control

- Probe temperature, if inserted (at core during chilling)
- Chamber temperature
- Active chilling phase
- Type of operation (timed, automatic, manual)
- Cycle type (chilling or freezing, soft or hard)
- Chiller state (chilling, storage, defrosting, stop)

ADDITIONAL DISPLAY:

"S" Control

- Time passed since start of cycle

"T" Control

- Time passed since start of cycle
- Temperature of individual sensors (on multi-point or multi-probe core probes)
- Alarm states (HACCP)

ANLIKER SLICERS
